Metairie, LA 70002

At Lane & Associates, we have several markets that offer comprehensive and affordable cyber insurance.

CYBER LOSS

The dark web, through its underground network of hackers and thieves, is constantly changing tactics to attack potential victims from different angles. We encourage you and your clients to protect your businesses beyond a cyber insurance policy.

Cyber Insurance - Every business that has customer records should have a cyber-insurance policy in place to help transfer the cost of a cyber loss to an insurer.

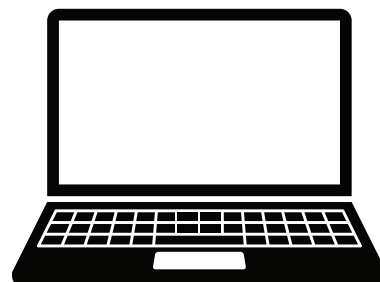

Security Awareness - Every business needs to build and invest in a "human firewall." It is estimated that 95 percent of all security incidents involve human error. Businesses must educate employees on how to identify and avoid phishing attacks and other forms of social engineering.

CYBER SECURITY

- Keep software patches updated
- Use strong passwords & update them every 90 -120 days
- Maintain strong endpoint security for devices accessing your systems remotely
- Encrypt all sensitive data

At Lane & Associates, we have several markets that offer comprehensive and affordable cyber insurance. Contact us today to see how we can help to protect your clients from the inevitable cyber threats and potential cyber loss.

Learn more about cyber security and how Lane can help you by going to gotolane.com/blog.
